

Tri-flash kit Ø 70 with 30 LEDs • 2 batteries case power supply

REF : 19601

Made in France

« This is a safety device designed to increase visibility in a construction site area. Equipped with three Ø70 mm optics / 30 LEDs, these warning and marking lights make it possible to effectively signal interventions in progress on the sides of traffic lanes.

A three-position switch, located on the housing, associated with a day/night cell, allows you to choose between stopping the system, continuous operation or automatic triggering at nightfall. »

- Very low power consumption.
- 3-position switch: OFF / 24-24h / Night trigger.
- Optiques Ø 70 de 30 LEDs.

ROADWORKS SIGNALING

Range: Sign Lighting Equipments

Tri-flash kit Ø 70 with 30 LEDs • 2 batteries case power supply REF : 19601

Very low power consumption. Robust optics designed for the construction site:

Each Ø70 optic has 30 yellow LEDs of high light intensity, cast in a black polyurethane resin. This process makes the light part completely waterproof, avoids corrosion and protects the whole from vibrations.

Efficient technology:

Thanks to LED technology selected to have the best intensity/consumption efficiency and a management box allowing its light power to be adapted according to the ambient lighting, this triflash kit consumes 2 to 3 times less than the others while being much brighter.

Easy connection:

With its jack-type RC (rapid connect) connector, connecting or changing the optics requires no tools, just like replacing the batteries.

TECHNICAL INFORMATION

Operating mode	3 modes: OFF / H24 / Night trigger Double flash
Power supply	Two 6 V type 4R25 saline or alkaline batteries (not supplied)
Autonomy	2 510 hours with 2 batteries 45 Ah - 25 mA
Protection	Optics : IP 67. Housing : IP 53.
Size (L x l x h)	Optic : 75 x 35 x 75 mm – Housing : 155 x 180 x 175 mm
