ROADWORKS SIGNALING

Range: Maintenance Equipments

Intervention triangle 700 batteries + charger

REF : 26386

High visibility:

Each Ø70 optic has 30 high light intensity yellow LEDs, cast in a black polyurethane resin.

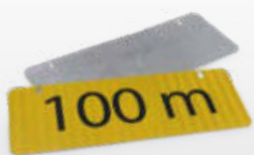

Waterproof and resistant product:

Thanks to the polyurethane resin, the luminous part avoids corrosion and protects all vibrations. The organization of the wiring of the LEDs in the form of parallel/serial networks (6 networks of 5 LEDs) guarantees very high fault tolerance of the light element (a defective LED only causes the extinction of 1/6 of it).

TECHNICAL INFORMATIONS

Operating mode	Dual flash
Power supply	NiCd 8.4-V4 Ah battery built into the triangle
Autonomy	35 hours – 50 mA
Puissance lumineuse	Optic: IP 67
Size (L x l x h)	660 x 120 x 700 mm (closed foot)
Weight	7 Kg
Options	Symbol, road-sign
